Push down firmly on the top of the Siderails (D) until they seat themselves over the pins inside the legs slots. Be sure the small ledge on each Siderail (D) is facing inward. There are two levels for the Siderails (D). If you plan on using a trundle, please use the highest setting.
2. Repeat with the Footboard (B).
3. Lay the Slat Roll (C) down on the inner ledges of the Side Rails (D). Using a Phillips Head Screwdriver, fasten the Slat Roll (C) to the Siderails (D) with the Wood Screws (E). Insert the Wood Screw (E) though the pre-drilled holes on the Slat Roll (C) and into the Siderails (D). Loosely tighten. Once all screws are in place, fully tighten. Periodically tighten all connections. Adjust the recessed levelers located at the bottom of each leg to keep the whole assembly level.
